

## City of Sachse Water Tank Rehabilitation

Sachse, Texas

CobbFendley is providing engineering design, structural engineering, bid coordination, construction administration and record drawing preparation for the **rehabilitation of two existing elevated and two ground storage water tanks**. The elevated 750,000 and 150,000 gallon water tanks include interior and exterior coatings. The two 500,000 gallon ground storage tanks also include structural and appurtenance repairs. The tanks are to be rehabilitated in stages to prevent water shortages, and will bring the system back into TCEQ compliance.

**Construction Cost:**

\$737,000

**Completion Date:**

In progress
