

DFW Midstream Northern and Southern Connector

Dallas/Fort Worth, Texas

CobbFendley worked with DFW Midstream to provide SUE investigation and Land Surveying services along a 27-mile route through the municipalities of Arlington, Grand Prairie, Fort Worth Haltom City, Richland Hills, North Richland Hills, and Saginaw. Throughout the duration of the project, CobbFendley conducted more than 200 Quality Level A SUE test holes and performed more than 40,000 linear feet of Level B SUE designation and data collection. In addition to coordinating with multiple consultants, CobbFendley was involved in the permitting processes for Arlington, Grand Prairie, Fort Worth Haltom City, Richland Hills, North Richland Hills, Saginaw and TxDOT in order to perform SUE and surveying within their respected rights-of-way. The overall scope of work, including the various permits, was delivered on a fast-track time schedule.

Project Length:

27 miles

Completion Date:

2009
