

Project Brays – Brays Bayou Watershed Harris County, Texas

CobbFendley has received 17 work authorizations from the Harris County Flood Control District to provide surveying services as part of Project Brays. For each of these projects CobbFendley recovered project horizontal and vertical control, established additional control as needed, topographic surveys of existing conditions prior to excavation, as-built topographic surveys of various compartments including DTMs and volume calculations for final pay quantities and as-built survey of constructed outfall structures for contract compliance check. Surveys included static and RTK (VRS) GPS, conventional total station surveying.

Individual work authorizations included:

- Three boundary surveys for right-of-way acquisition located at Telephone Road and Brays Bayou, Fannin and South Braeswood and Wheeler west of Wayside.
- Willow Water Hole Detention Basin
- Art Storey Park Detention Basin
- Eldridge Detention Basin

Completion Date:

2010
