

University of Houston Downtown, Shea at Main Street Houston, Texas

CobbFendley conducted a boundary survey for purchase of property located at Main and Shea Street for the expansion of the University of Houston Downtown campus. Scope of work included preparation of boundary survey drawing, metes and bounds description and preparation of survey documents for a water meter easement and vault rights crossing public rights-of-way. In addition, a topographic survey was performed for the property for use in the design of campus facilities. Services performed also included placement of permanent benchmarks for monitoring the site by the contractor and locating monitor wells with respect to the boundary.

Project Length:

217,800 square feet (5 acres)

Completion Date:

2008
