

US 290E Texas Gas Distribution Service Relocation Austin, Texas

CobbFendley provided the **engineering design for multiple steel and poly distribution lines** within the CTRMA US290E Segment 1A corridor. Conflicts were identified and a relocation plan coordinated with the facility owner. Relocation plan and profiles were designed according to TxDOT criteria and included within the roadway construction plan, specification, and estimate (PS&E) set. CobbFendley developed natural gas specifications and pay item criteria for the PS&E set. Additionally, CobbFendley generated unit costs to approximate total relocation costs.
